

StorageAppliance 500 Series

Version 5 SPANStor

The StorageAppliance 500 (SA500) series is a family of full-feature Network Attached StorageAppliances that can store up to 480GB of data within 1U of space. The 502 model can be configured with one, two, or three 160GB ATA133 disk drives that can support RAID 0,1,5,and10. The 501 is available with up to three 120GB ATA100 disk drives. The 500 series is equipped with a powerful Intel Xeon 2.2GHz CPU that powers our award-winning SPANStor V5 NAS Software. That means you get all the capabilities of our SPANStor V5 Software at an incredibly affordable IDE price range. Network Storage can't get any easier on the budget or storage requirement.

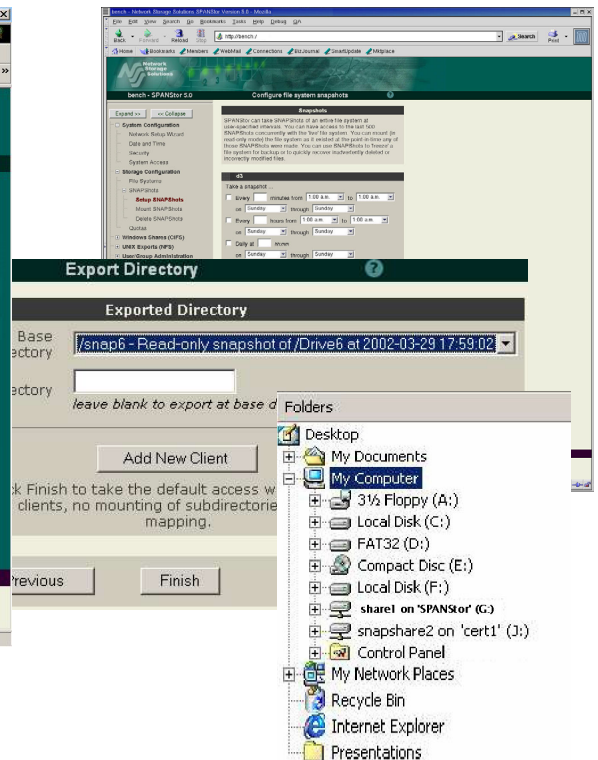

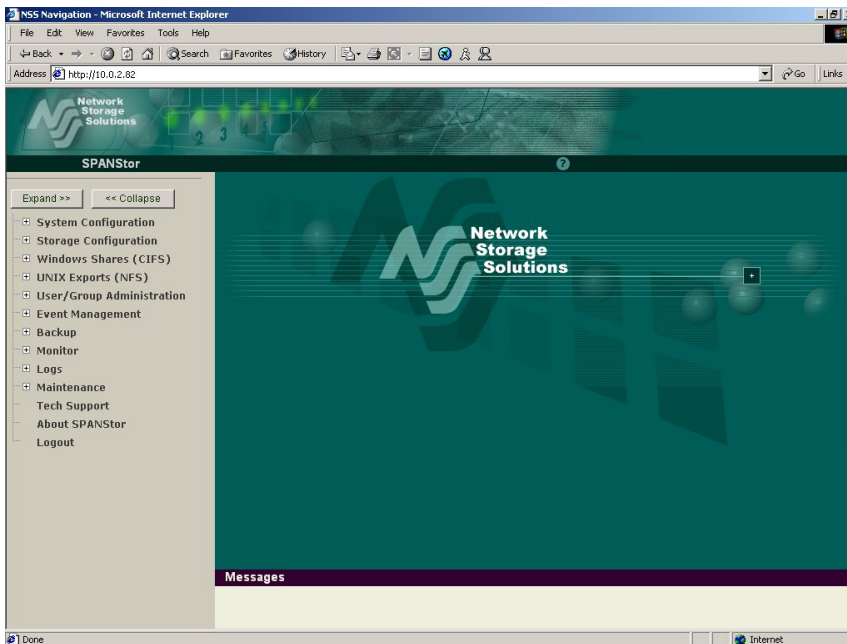

And everything you need to install and configure is included, even the RJ45 Ethernet cable; just plug and play. So test drive one of our StorageAppliances with SPANStor V5 Software today. The SA500 offers the same feature set as our Enterprise models including features such as snapshots, quotas, real-time replication, etc...

Feature Set

- SPANStor V5 open architecture NAS Software
- SPANSnap point-in-time view of the file system; up to 500 snapshots per file system
- Multi-Protocol File Locking
- Supports NFS, CIFS, and HTTP
- Supports DNS, NIS, and WINS
- FTP support for client and server
- SNMP v2 with trap support
- NDMP support
- File quotas
- Multiple NIC support
- Journaling File System
- Optional SpanSync file-based replication; one to many and many to one real time remote replication supported
- Optional virus scanning

StorageAppliance 500 Series

Version 5 SPANStor

Hardware Specifications

CPU	Intel Xeon 2.2GHz
Memory	512MB DDR RAM standard optional expansion up to 4GB
Disk Drives	Model 501 - up to three hot swappable 120GB ATA100 disk drives at 7200RPM Model 502 - up to three hot swappable 160GB ATA133 disk drives at 5400RPM
RAID Supported	0, 1, 5, and 10
Operating System	SPANStor V5 preloaded
Ethernet	Two 10/100/1000 RJ45 Ethernet fiber optional
Power Supply	350W 100-240 VAC auto switching
Cooling	9 X 40mm high pressure fans
Floppy/CD-ROM	Standard

SPANStor V5 browser-based GUI Management Software makes integration and operation of our NAS Software simple

Environmental Specifications

Dimensions	19x25.6x1.75 in (WxDxH)
Weight	29-35 Lbs
Temperature	0-50 degrees Celsius
Humidity	5-95% non-condensing
Regulations	FCC, CE, UL/CUL, TUV
